

TIAGO MATIAS

Front-End Developer | Software Engineer (Web & Mobile)

tiagomatias072@gmail.com | Luanda, Angola

github.com/tiagomatias930 | linkedin.com/in/tiago-matias-062b88217 | g.dev/tiagomatias

PROFESSIONAL PROFILE

React developer with over 2 years of hands-on experience in web and mobile applications, specializing in React, React Native, TypeScript, and Next.js. Experience across the full development cycle — from building reusable components to consuming REST APIs — in agile, remote, and multicultural environments, including technical volunteering with United Nations Volunteers, collaboration with international teams at Expo 2025 Osaka, Japan, and a digital transformation program in the Oil & Gas sector (Pumangol). Familiar with form validation (React Hook Form, Zod), CSS-in-JS (styled-components), and version control with Git/GitLab. Continuously developing skills in automated testing (Jest, React Testing Library). Native Portuguese speaker with technical English proficiency, experienced working with international partners and teams.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C, C++

Frontend & Mobile: React.js, React Native, Next.js, Flutter, Dart, HTML5, CSS3, styled-components (CSS-in-JS), React Hook Form, Zod, UI/UX Design

Backend & APIs: Node.js, REST API integration and consumption, Python, PHP (Laravel)

Testing & Quality: Jest, React Testing Library (practical working knowledge)

Tools & DevOps: Git, GitLab, Docker, Google Cloud Platform, n8n

Methodologies: Scrum, Agile, code review, distributed team collaboration

Languages: Portuguese (Native), English (Technical/Intermediate — practical experience communicating with international teams and partners)

PROFESSIONAL EXPERIENCE

Junior Technical Software Developer — Innovation and Development — United Nations Volunteers (UNV)

July 2026 – Present | Online Volunteering, Germany

- Online Volunteer (UNV), providing research and digital development support for social-impact projects in Artificial Intelligence, climate-smart agriculture, and organizations' digital presence.
- Contributed to platform analysis, technical recommendations, and knowledge documentation for international teams.

Web Designer (UI/UX) — Pumangol

July 2025 – May 2026 | Luanda, Angola

- Designed UI/UX interfaces for the Oil & Gas sector's digital transformation program, producing high-fidelity prototypes for multiple platforms.
- Collaborated with cross-functional teams (product, engineering, and business) in an agile (Scrum) environment, delivering interactive prototypes aligned with client requirements and corporate visual standards.

Technology Freelancer — PFG Consultoria Educacional LTDA

September 2025 – Present | Remote, Brazil

- Provided remote technical programming guidance to Brazilian clients, covering JavaScript, TypeScript, Python, and Cisco Packet Tracer.
- Developed and corrected academic and professional projects, including technical reports and software components, with a focus on code quality and meeting deadlines.

Prompt Engineer — International Project — Expo 2025 Osaka, Japan

July 2025 – November 2025 | Remote

- Produced a 2D animated video using Artificial Intelligence for the Angola Pavilion at Expo 2025 Osaka.
- Collaborated on an Angola-Japan international cooperation project, communicating in English with global teams and partners while meeting internationally required deadlines and quality standards.

Mobile & Web Software Engineer — Agriconnect (Startup)

February 2025 – Present | Luanda, Angola

- Developed cross-platform mobile applications using React Native and Flutter for an agricultural-sector startup.
- Implemented reusable front-end interfaces in React.js and TypeScript (strict typing), consuming REST APIs with a Python backend.
- Participated in the full development cycle — from component design to deployment — using Git for team version control.

NutriScan App — Personal Project — React Native

Independent Project | Angola

- Developed an AI-powered nutrition-tracking mobile app, reaching over 80 users across more than 7 countries, with a reusable component architecture and REST API consumption.

EDUCATION

Software Engineering — 42Luanda

2024 – 2025 | Common Core completed | 42Advanced (Specialization, 2026 – in progress)

CERTIFICATIONS & ACHIEVEMENTS

- Expo 2025 Osaka: production of the video "The Story of Tchissola," screened at the Angola Pavilion, Osaka.
- Active participation in cybersecurity competitions (CTF) via the 42ctf.org platform.
- NutriScan app published on the Uptodown platform.
